Peter Drucker

About Remah Digital

We Are Your Technical Architects for Growth

Remah Digital is a specialized technology consultancy and development firm with full-stack engineering and marketing capabilities. We architect and build high performance digital solutions—then power them with data-driven growth (SEO, paid media, and conversion optimization)—to deliver measurable business outcomes.

Our Foundation

Born from the merger of two founder-led companies—Femtolayer (founded in 2008 by Mohamed Gomaa) and Winjii (founded in 2019 by Ayman Gaber) Remah Digital unites the strengths of its co-founders: Mohamed, a CEO and digital strategist with deep expertise in scaling complex projects, and Ayman, a CTO-level SEO and technical architect renowned for engineering robust, search-optimized systems. With a combined three decades of experience, they consolidated their companies to create Remah Digital and deliver a level of technical partnership previously unavailable in the MENA market.

Our Mission & Vision

Our mission is to serve as the dedicated technical partner for ambitious organizations, translating business strategy into resilient, scalable technology. We envision a digitally integrated MENA region where businesses leverage sophisticated systems to achieve market leadership.

"Quality is not an act, it is a **habit**."

Aristotle

Our Core Services

An Integrated Arsenal of Technical Capabilities

1.Strategy & Infrastructure

Strategic Technical Consultation

We provide high-level advisory to align your technology roadmap with your core business objectives.

Infrastructure, Security & IoT

We build and manage the secure, high-availability environments that your applications depend on.

- Server Administration & DevOps
- Cybersecurity & Penetration Testing
- IoT (Internet of Things)

Our Core Services

An Integrated Arsenal of Technical Capabilities

2. Marketing & Development

Digital Marketing & Growth Systems

- We engineer comprehensive marketing systems designed for peak visibility and quantifiable performance.
- Technical SEO, AEO & AIO
- Performance Marketing: Paid Ads (Google Ads, Social Ads)
- Content & Social Media Systems

Platform & Application Engineering

We build the robust web and mobile platforms that power your operations.

An Integrated Arsenal of Technical Capabilities

3. Advanced Automation & Design

AI & Process Automation

We deploy intelligent systems to create efficiencies and unlock data-driven insights.

System Design & Creative

We design intuitive user experiences that ensure high adoption and engagement

Why Choose Remah

The Remah Protocol: **Our Commitment to You**

An End-to-End Technical Partner

We provide a unified team for architecture, engineering, and optimization, eliminating integration risk and ensuring accountability.

Deep Industry Expertise

Proven deployment capabilities in regulated and data-sensitive sectors like Healthcare, Government, and Education.

Founder-Led Technical Oversight

Our projects are directly overseen by our founders, ensuring every solution meets their exacting standards for quality and performance.

40+ Specialists Across 7 Core Disciplines

A multi-disciplinary force of certified engineers strategists, and developers ready to deploy.

Focus on System Reliability & ROI

Our primary metrics are system uptime, performance efficiency, and the direct, measurable impact on your bottom line.

Our Process
Our **Agile** Development & Deployment Framework

01

Discover & Scoping
Technical requirements analysis and strategic alignment.

Architecture & Strategy
System design, technology stack selection and project blueprinting.

02

Development & Integration
Agile sprints, code reviews, and continuous integration.

03

Launch & Deployment
Staging, user acceptance testing (UAT), and seamless production launch.

04

05

Performance Optimization
Post-launch monitoring, data analysis, and iterative improvement.

Dedicated Support &Maintenance
Service Level Agreements (SLAs) and ongoing technical support.

06

"The goal is to turn data into **information**, and information into **insight**."

Carly Fiorina

former CEO of Hewlett Packard

Portfolio Highlights

Deployed Solutions. **Proven Impact.**

Al Moosa Health Group

Project:

Enhancing Website Infrastructure & SEO Performance

Technical Challenge:

Limited online visibility and engagement due to poor site structure, slow performance, and weak technical SEO reducing user trust and competitiveness.

Solution Deployed:

Fixed indexing and site architecture issues, improved caching and schema, enhanced security and page speed, and optimized booking CTAs to boost user experience and conversions.

Quantifiable Result:

Achieved a 61.7% increase in search visibility and 97.7% rise in impressions. Organic traffic grew by 114.1%, with a 90.9% boost in click-through rate. Improved ranking stability and reduced crawl errors led to sustained SEO growth.

Deployed Solutions. **Proven Impact.**

Ataa Educational Company

Project:

Enterprise-Scale Smart Attendance System (IoT & AI)

Technical Challenge:

Manual attendance tracking for over 45,000 students and 5,500 staff was causing delays and errors
There was a lack of unified reporting and inconsistent parent communication

Solution Deployed:

Engineered a smart biometric attendance platform using fingerprint, face, and palm recognition
Deployed an AI-based reporting engine and a centralized cloud dashboard, with automated SMS notifications for parents

Quantifiable Result:

Reduced administrative workload for attendance staff by over 60%
completely eliminated manual attendance errors and enhanced parent satisfaction through real-time communication

Deployed Solutions. **Proven Impact.**

NephroCare MD

Project:

HIPAA-Compliant Custom Clinic Management System

Technical Challenge:

The US-based clinic faced fragmented patient scheduling inconsistent data handling that risked HIPAA non-compliance, and security vulnerabilities .

Solution Deployed:

Built a custom clinic management system from scratch with automated doctor scheduling and a secure patient portal. Engineered an encrypted server infrastructure designed to meet strict HIPAA standards .

Quantifiable Result:

Reduced appointment management time by 60% through automation, achieved a 100% HIPAA compliance audit pass rate post-launch and improved clinical efficiency with real-time data visibility .

"Great things in business are never done by one person.They're done by a **team of people**."

Steve Jobs

Our Team

Leadership Engineered for **Excellence**

Mohamed Gomaa
CEO (21+ years of expertise)

A seasoned digital strategist and business architect with a track record of transforming enterprise operations. Mohamed's focus is on aligning technical capabilities with long-term commercial objectives.

Ayman Gaber
CTO (18+ years of expertise)

A leading SEO expert and systems architect, Ayman specializes in building scalable, high-visibility digital platforms. His technical leadership ensures every solution is robust, future-proof, and optimized from the ground up.

Philosophy Statement

"We founded Remah on a simple principle: to be the technical partner we always wanted but could never find. We build things the right way—to perform, to scale, and to last."
