A person wearing a white lab coat and a VR headset is shown in profile, interacting with a large, glowing blue and yellow digital interface. The interface features a grid of data points and a large, stylized blue arrow pointing upwards. The background is dark with a blue and yellow gradient.

"The best way to predict the future is to **create it.**"

Peter Drucker

About Remah Digital

We Are Your Technical Architects for Growth

Remah Digital is a specialized technology consultancy and development firm with full-stack engineering and marketing capabilities. We architect and build high performance digital solutions—then power them with data-driven growth (SEO, paid media, and conversion optimization)—to deliver measurable business outcomes.

Our Foundation:

Born from the merger of two founder-led companies—Femtolayer (founded in 2008 by Mohamed Gomaa) and Winjii (founded in 2024 by Ayman Gaber)—Remah Digital unites the strengths of its co-founders: Mohamed, a CEO and digital strategist with deep expertise in scaling complex projects, and Ayman, a CTO-level SEO and technical architect renowned for engineering robust, search-optimized systems. With a combined three decades of experience, they consolidated their companies to create Remah Digital and deliver a level of technical partnership previously unavailable in the MENA market.

Our Mission & Vision:

Our mission is to serve as the dedicated technical partner for ambitious organizations, translating business strategy into resilient, scalable technology. We envision a digitally integrated MENA region where businesses leverage sophisticated systems to achieve market leadership.

"Quality is not an act, it is a **habit**."

Aristotle

Our Core Services

An Integrated Arsenal of Technical Capabilities

1.Strategy & Infrastructure

Strategic Technical Consultation

We provide high-level advisory to align your technology roadmap with your core business objectives.

Infrastructure, Security & IoT

We build and manage the secure, high-availability environments that your applications depend on.

- Server Administration & DevOps
- Cybersecurity & Penetration Testing
- IoT (Internet of Things)

Our Core Services

An Integrated Arsenal of Technical Capabilities

2. Marketing & Development

Digital Marketing & Growth Systems

- We engineer comprehensive marketing systems designed for peak visibility and quantifiable performance.
- Technical SEO, AEO & AIO
- Performance Marketing: Paid Ads (Google Ads, Social Ads)
- Content & Social Media Systems

Platform & Application Engineering

We build the robust web and mobile platforms that power your operations.

3. Advanced Automation & Design

AI & Process Automation

We deploy intelligent systems to create efficiencies and unlock data-driven insights.

System Design & Creative

We design intuitive user experiences that ensure high adoption and engagement

Why Choose Remah

The Remah Protocol: **Our Commitment to You**

An End-to-End Technical Partner

We provide a unified team for architecture, engineering, and optimization, eliminating integration risk and ensuring accountability.

Deep Industry Expertise

Proven deployment capabilities in regulated and data-sensitive sectors like Healthcare, Government, and Education.

Founder-Led Technical Oversight

Our projects are directly overseen by our founders, ensuring every solution meets their exacting standards for quality and performance.

40+ Specialists Across 7 Core Disciplines

A multi-disciplinary force of certified engineers, strategists, and developers ready to deploy.

Focus on System Reliability & ROI

Our primary metrics are system uptime, performance efficiency, and the direct, measurable impact on your bottom line.

Our Industries

Engineering Solutions for **Demanding Sectors**

Healthcare & Pharmaceuticals

Media & Entertainment

Retail & High-Volume eCommerce

Telecommunications

Government & Public Sector NGOs

Travel & Tourism

Real Estate & Hospitality

Ride-Hailing

Education & Ed-Tech

AI & Automation

Our Process

Our **Agile** Development & Deployment Framework

Architecture & Strategy

System design, technology stack selection and project blueprinting.

Launch & Deployment

Staging, user acceptance testing (UAT), and seamless production launch.

Dedicated Support & Maintenance

Service Level Agreements (SLAs) and ongoing technical support.

01

Discover & Scoping

Technical requirements analysis and strategic alignment.

02

Development & Integration

Agile sprints, code reviews, and continuous integration.

04

Performance Optimization

Post-launch monitoring, data analysis, and iterative improvement.

06

The background image shows two men in traditional Arab clothing, including ghutras and thobes, looking towards the right. They are positioned in the foreground, with the man on the left slightly behind the one on the right. In the background, there is a digital overlay of a city skyline, likely Dubai, with various skyscrapers. Overlaid on the city and the men are numerous thin, glowing blue lines that form a complex network, suggesting data flow or a digital infrastructure. A bright yellow-orange light source is visible behind the men, creating a strong backlight effect and illuminating the scene.

"The goal is to turn data into **information**,
and information into **insight**."

Carly Fiorina
former CEO of Hewlett-Packard

Portfolio Highlights

Deployed Solutions. Proven Impact.

Magrabi Hospitals

Project:

Long-Term Digital Transformation & SEO Dominance

Technical Challenge:

Started with only 5,000 monthly search visits in 2017 facing strong competition and lacking technical SEO optimization

Solution Deployed:

Executed a long-term SEO campaign from 2017-2022 developing hundreds of medical articles, improving site performance building high-quality backlinks , and optimizing the patient booking process.

Quantifiable Result:

Grew from 5,000 monthly search visits to 770,000 by December 2022, achieving a 15,000% increase in organic traffic and securing leading positions for high-value medical keywords.

Ataa Educational Company

Project:

Enterprise-Scale Smart Attendance System (IoT & AI)

Technical Challenge:

Manual attendance tracking for over 45,000 students and 5,500 staff was causing delays and errors

There was a lack of unified reporting and inconsistent parent communication

Solution Deployed:

Engineered a smart biometric attendance platform using fingerprint, face, and palm recognition

Deployed an AI-based reporting engine and a centralized cloud dashboard, with automated SMS notifications for parents

Quantifiable Result:

Reduced administrative workload for attendance staff by over 60%

completely eliminated manual attendance errors and enhanced parent satisfaction through real-time communication

NephroCare MD

Project:

HIPAA-Compliant Custom Clinic Management System

Technical Challenge:

The US-based clinic faced fragmented patient scheduling inconsistent data handling that risked HIPAA non-compliance, and security vulnerabilities .

Solution Deployed:

Built a custom clinic management system from scratch with automated doctor scheduling and a secure patient portal. Engineered an encrypted server infrastructure designed to meet strict HIPAA standards .

Quantifiable Result:

Reduced appointment management time by 60% through automation, achieved a 100% HIPAA compliance audit pass rate post-launch and improved clinical efficiency with real-time data visibility .

USA - Detroit

A man in a white thobe and ghutra is pointing at a whiteboard. The whiteboard has a diagram titled "Strategic Plan" with arrows pointing to various boxes. One box is labeled "Marketing". Another box is labeled "Operations (Production)". There are also some numbers and text on the board, such as "70/24" and "3500". The background is a blurred office setting with a window showing a city view.

"Great things in business are never done by one person. They're done by a **team of people.**"

Steve Jobs

Our Team

Leadership Engineered for **Excellence**

Mohamed Gomaa

CEO (21+ years of expertise)

A seasoned digital strategist and business architect with a track record of transforming enterprise operations. Mohamed's focus is on aligning technical capabilities with long-term commercial objectives.

Ayman Gaber

CTO (18+ years of expertise)

A leading SEO expert and systems architect, Ayman specializes in building scalable, high-visibility digital platforms. His technical leadership ensures every solution is robust, future-proof, and optimized from the ground up.

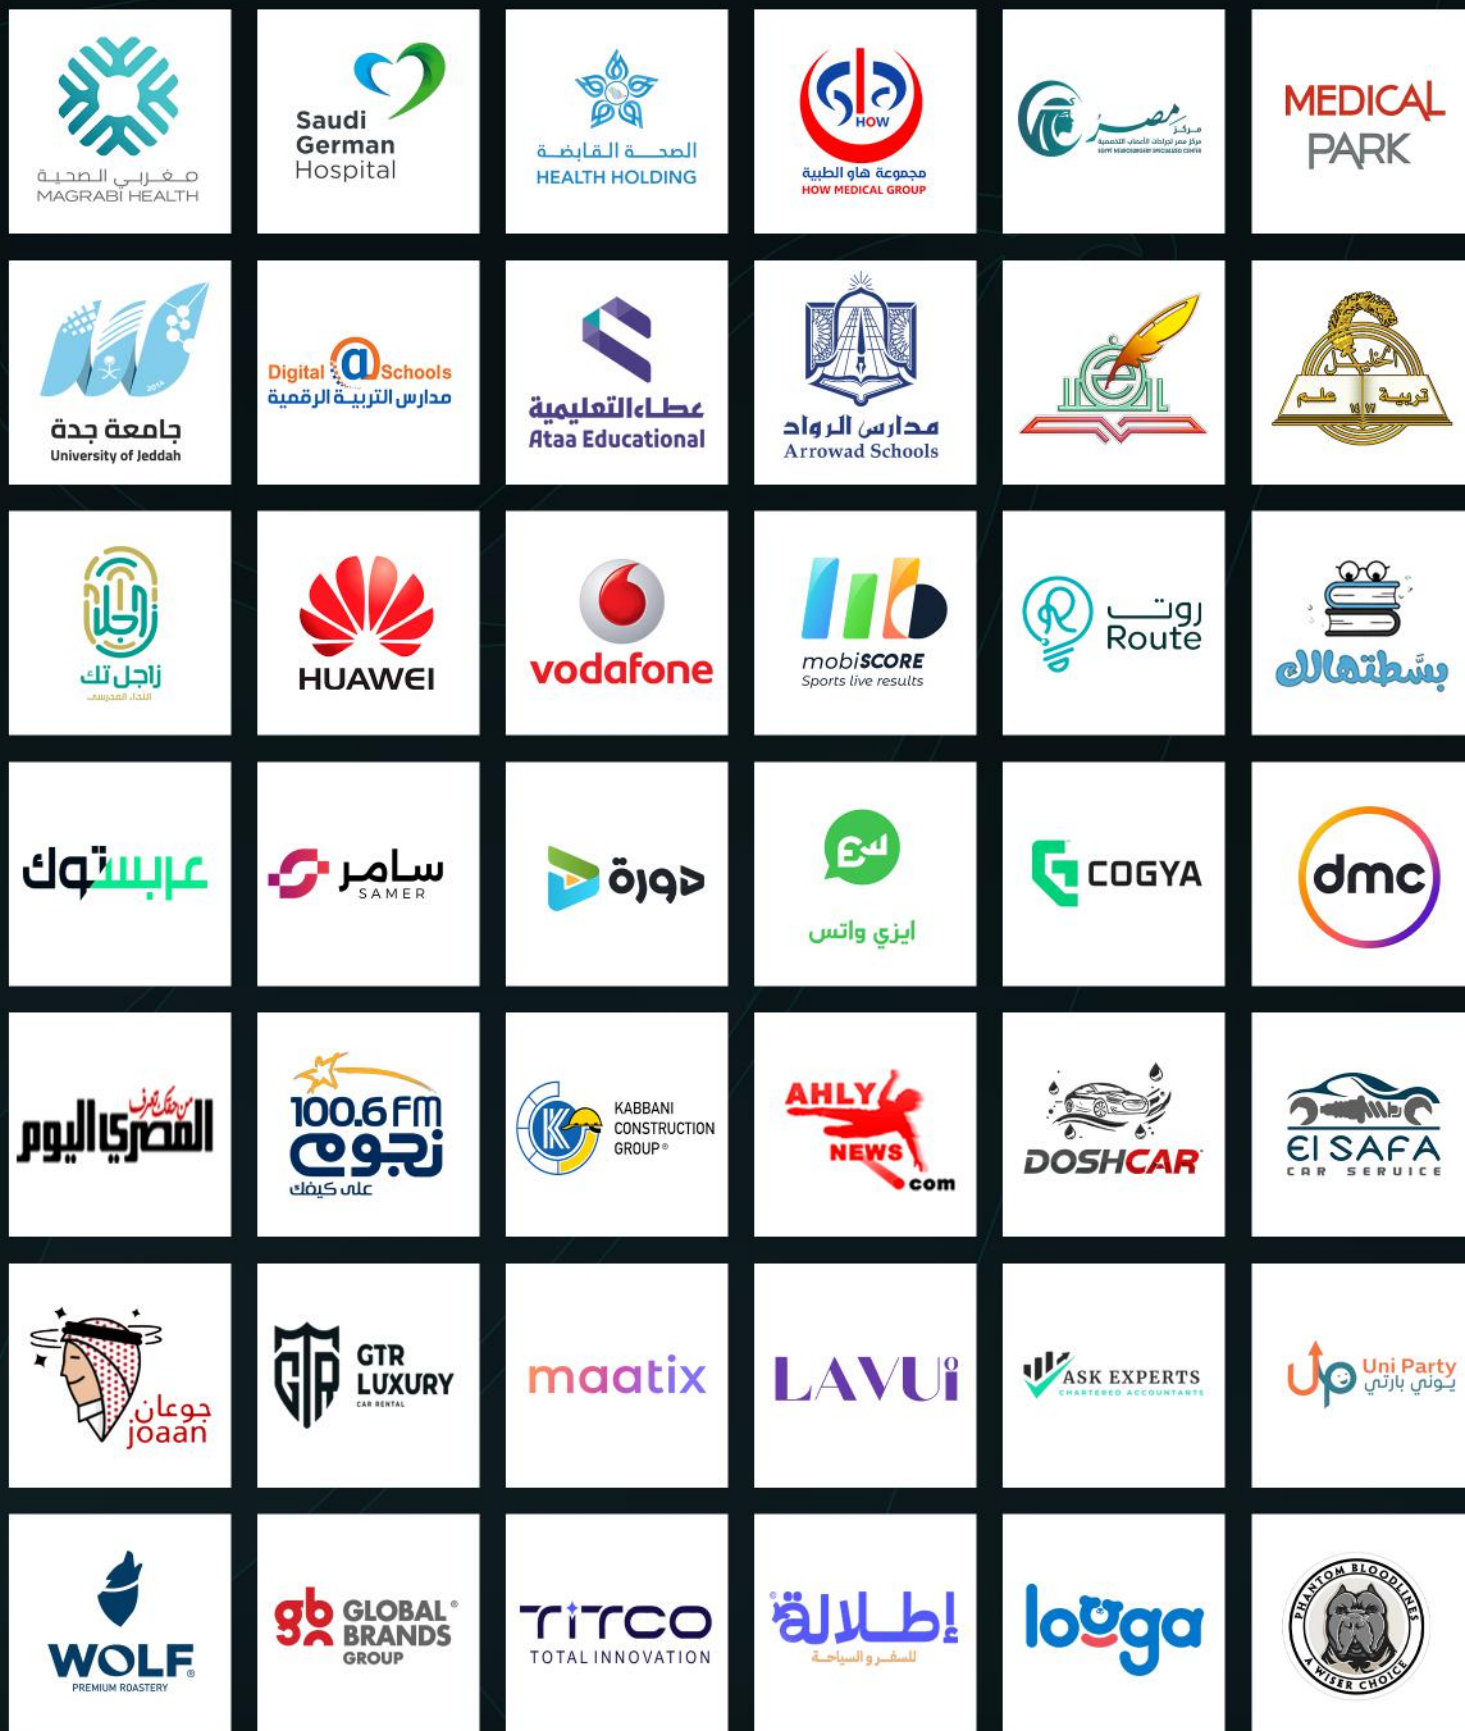

Philosophy Statement

"We founded Remah on a simple principle: to be the technical partner we always wanted but could never find. We build things the right way—to perform, to scale, and to last."

Partners & Clients

Trusted by Leading Brands Across the Region

"Coming together is a beginning, staying together
is progress, and working together **is success.**"
